

**NEW! Attachment-Based Play Therapy in Early Childhood**

Examine how attachment is formed in early stages of development to caregivers. Learn several activities to promote relationship building, stages of play, and active learning. These can be used in the classroom or shared with families to promote healthy relationships. Topics to be explored include stages of play in early childhood, attachment theories, and the role of the teacher in promoting relationships in the classroom.

Kansas/Missouri approved Content Area IV – Level 2, CDA Subject Area 2.

This was a very eye-opening course. It will be very fun to see how we implement these ideas into our work.

Sarah P.

### You Gotta Move

Children are always on the move. They move parts of their body and their whole body. They also move with objects and move to music. Review strategies to incorporate movement into the entire day. Explore materials for movement as well as develop a list of items to include in the classroom. Learn why movement is critical in the early years.

### Beauty in the Lives of Young Children

Explore the importance of beauty through brainstorming activities, strategizing design elements, and analyzing physical arrangements of learning environments. Complete a "before" and "after" sketch of your classroom area to share using the 5 design elements. Discuss the role of beauty in human lives as described by Abraham Maslow, Howard Gardner and Ruth Bendler. Leave with practical and easy-to-implement ideas to help children to recognize and experience beauty in their daily lives.
