AACC’s Sustainability Education and Economic Development (SEED) Center has three new resources: http://www.theseedcenter.org/default.aspx

- **Webinar**: *Alternative Fuel Vehicles: New Technology, Refined Workforce Programs, November 30, 2011, 1:00 p.m. (ET)*. Learn about future workforce development opportunities in this industry and from two model colleges with cutting-edge hybrid vehicle training initiatives, including effective train-the-trainer efforts.

- **Webinar**: *Community Colleges Leading Rural-Based Green Economy Initiatives, December 8, 2011, 2:00 p.m. (ET)*. Learn how the U.S. Department of Agriculture is supporting these efforts, how community colleges are preparing a qualified workforce to support these sectors, and how regional partnerships are leading to the job growth.

- **SEED’s Resource Center** has expanded to include two new sectors: transportation and fuels and sustainable agriculture, food and land. Developed and vetted by a technical advisory group of community colleges, nonprofits, and private industry leaders, these new collections include curricular materials, employment industry projections, information about certification, and innovative practice models.

Also, instructors should consider joining the SEED Green Policy Action Group to stay up-to-date on national and state energy and related green public policies.

Also, be sure to check out the SEED Pre-Conference Session on January 25th, 2012 at AACC’s Workforce Development Institute (WDI). SEED Members can contact us to qualify for a stipend to attend the session for FREE.
Student Sustainability Awareness & Perception Survey

- 798 responses

- How well do you believe you understand the meaning of the term “sustainability”? 
  - Very Well – 24.4%
  - Well – 40.8%
  - Average – 29.2%
  - Poorly – 4.3%
  - Very Poorly – 1.3%
Which of the following words do you associate with the term “sustainability”?

- Recycling – 67%
- Efficiency – 66.9%
- Renewable – 66.2%
- Future Generations – 65%
- Responsibility – 64.5%
- Ecosystems – 61.4%
- Daily Habits – 58.1%
- Nature – 55.6%
- Green – 53.8%
- Important – 52.1%
- Farming – 50.9%
- Population Growth – 47.4%
- Climate Change – 37.2%
- Water Rights – 31.3%
- Politics – 27.3%
- Social Justice – 23.9%
- Poverty – 24.3%
- Profitable – 20.6%
- Extinction – 19.9%
- Expensive – 11.5%
- Over-regulation – 10.8%
- Externalities – 7.1%
- Hippies – 6.1%
- Fad – 5.3%
Which of the following words do you associate with the term “sustainability”?

Other:
- I support sustainability, but not because of pollution. Given the attitude of the masses, sustainability is both profitable and a PR bonus. This survey reflects the mass hysteria in society.
- Liberal propaganda.
- To perform at a higher level of perseverance, during times of "life happens".
- Anything whether it be nature, factories or stores monthly sales that keep a certain balance. Something that is not necessarily out of our control but we also don't have complete control of it and it remains at a certain level.
Which of the following words do you associate with the term “sustainability”?

Other Cont.

- Anything whether it be nature, factories or stores monthly sales that keep a certain balance. Something that is not necessarily out of our control but we also don't have complete control of it and it remains at a certain level.

Beyond important, necessary.

Education, life style, animal protection, vegetarianism.

Student Sustainability Awareness & Perception Survey

- Please indicate your level of interest in each of the following topics:
  - Other:
    - Academia needs to shape the future. Not cater to the old system of capitalism.

- I am interested in the botany, farming, food, biology, etc. I am not interested in learning about these subjects when they are presented in an antiquated liberal manner. I believe in the American way of life. I don't believe in "sustainability".

- Personal Responsibility - Not the leftist view that man is destroying the planet.
Please indicate your level of interest in each of the following topics:

- Other Cont.
  - Also, very interested in learning more about health alternatives and overall nutrition. JCCC offers few, if any, courses in these areas. I feel that there is a hunger in this next generation to make more informed decisions but we need more resources!

- Think recycling is extremely important but EPA and regulations have gone too far. Climate change/global warming is a money making political scam. Need to get reliable research data before I'll take it seriously. Very int. not always positive.
Student Sustainability Awareness & Perception Survey

- Please indicate your level of interest in each of the following topics:
  - Other Cont.
    - Economics and its application to business today.
  
  - As a mother, I'm somewhat interested in all of these to an extent for my kids. However, social justice is a fluid concept and some can take it too far.

  - I believe it's important to conserve resources and preserve nature. I also believe that climate change is a theory and is not fact.

How do you find student champions at a 2 year community college?

• We've tapped into PTK honorary society, they have to do service any way
• We have a sustainability student group on campus.
• Present projects to Student Senate to reach out to their groups--then have collaborative events.
• Establish Eco Reps for outreach (paid position); launched Students for Sustainability Club; give interviews and presentations in
• We had a local business close and some students chose to take classes in renewable energy technology and they were interviewed on a local tv st
• Mainly through our instructors and Sust.Club.
• We go and request nominations and if none are submitted we look ofr them on campus or usually they present themselves through the clu

• Difficult with PCP (parking lot - classroom - parking lot) syndrome.
• Engage student leaders such as student government officers and honors students
Next Webinar will be December 14th
