

# Your Interests, College Majors & Careers

Johnson County Community College  
Career Development Center  
Student Center, 2<sup>nd</sup> floor  
(913) 469-3870

## How to Use this Packet

Each of the following colored pages features an interest area. JCCC career programs, transfer programs for college majors, and a career sampling are listed that relate to each interest. This information, along with career-related and college major resources (arranged by Interest Codes) in the Career Development Center, can offer you a starting point to begin your career exploration process.

You can use this packet to informally find your 3-letter Interest Code. This is also known as your Holland Code, named for Dr. John Holland, the creator of the Holland Occupational Themes.

1. Go through the six colored pages (one for each interest theme) and check the boxes that describe you in each of the *Are you?* and *Do you like to?* categories.
2. Total your checks for each page and write the total in the upper right-hand corner in the space provided.
3. Then see the inside back cover to write your 3-letter code and begin using an online resource to learn more about career fields that match with your interest themes.

# JOHN HOLLAND'S OCCUPATIONAL THEMES

Choosing a career path or major can be confusing and overwhelming. One way to help narrow the choices is to find the right fit between your interests and the environment of a particular career path. Dr. John Holland's theory places people loosely into six different groups based upon personality types and occupational interests. Because people are too complex to describe with a single theme, career assessments often provide a three-letter code, referred to as one's Holland Code, that identifies the three areas of highest interests.

	<b>C</b> = Certificate <b>T</b> = Training/class only
